

1. To view the leaderboard data:

bash

Connect to MySQL container

`docker exec -it coderush-db mysql -uroot -prootpassword`

Once connected to MySQL, use these commands:

`USE coderush;` *# Switch to coderush database*

`SHOW TABLES;` *# Show all tables*

`SELECT * FROM leaderboards;` *# View leaderboard entries*

`SELECT * FROM users;` *# View user accounts*

2. To clear/remove entries:

A. Clear just the leaderboard entries:

sql

Clear all leaderboard entries but keep the table structure

`DELETE FROM leaderboards;`

Reset auto-increment counter

`ALTER TABLE leaderboards AUTO_INCREMENT = 1;`

B. Clear user accounts:

sql

Clear all user accounts but keep the table structure

`DELETE FROM users;`

Reset auto-increment counter

`ALTER TABLE users AUTO_INCREMENT = 1;`

C. Complete reset (nuclear option):

bash

Exit MySQL first

`exit`

Stop containers

`docker-compose down`

Remove the volume containing the database

```
docker volume rm coderush_mysql-data
```

```
# Rebuild and start fresh
```

```
docker-compose up -d
```
